Лабораторна робота №1

Тема: Адаптивна верстка. Робота з трансформаціями

Були поставленна задача реалізувати сторінку за шаблоном, з довільним зображеннями та довільним контентом. Я вирішив виконати точну копію цього шаблону.

Fixed element щорозширюється

І адаптивні в якому все вистраюється в рядок

Висновок: на цій лабораторній було продемонстровано навички в вестці сайту, точному відтворенні завдання. Ми згадали деякі нюанси при роботі з css і вивчили нові. Цікавим було створення fixed елемента, на його створення можливо пішло більше всього часу як для окремого елемента.
